

**Maxon Industries will be joining the Putzmeister America Exhibit at
2018 SME Annual Conference and EXPO
February 25-28, 2018
Minneapolis Convention Center
Booth 1227**

We welcome you to stop by and discuss some of the new advancements for ground support including the industry leading Putzmeister (Allentown) shotcrete technology and the new WetKret Nozzle Carriers.

Putzmeister WetKret 5 self-propelled robotic shotcrete unit, complete with pump, air compressor, dosing pump and telescoping articulated 54' vertical reach.

We will also be exhibiting the Putzmeister Industrial Pump Technology in the booth. Applications include coal sludge, fly ash, and muck pumping for mining and tunnel construction.

Putzmeister industrial pumps including BSA and KOS (S-tube piston pumps), KOV (Ball Valve piston pump), HSP (seat valve piston pump) and EKO (Single piston pump).

Maxon has introduced a line of paste backfill mixers and remixers for mine applications, and continues with rubber tired, skid or rail mounted equipment for transporting and placing concrete, shotcrete and grout.

Maxon 20 cubic meter capacity paste mixer during installation at Escobal Silver Mine in Guatemala.

We'd like to share our experiences with you and discuss your upcoming project requirements.
